CLEVELAND, OHIO

Jury of Selection

HENRY G. KELLER

CHARLES F. DEKLYN

CARLE E. SEMON

FRANK C. BAKER

ALBERT H. MARVIN

“ Isabella ”

AMELIA VAN BUREN

IN presenting the collection of photographic work contained in the First Annual Salon of The Cleveland Camera Club, the Jury of Selection has endeavored to hang only those prints showing distinct artistic merit and has not been influenced by the printing medium or any false impression caused purely by photographic manipulation.

The club makes no apologies for photography, but, on the contrary, presents this collection to the art-loving public of Cleveland, with a feeling that its pictorial value will fully justify photography's claim to rank among the fine arts.

THE SALON COMMITTEE.

A Modern Camera for Serious Work

Long Focus Century Grand

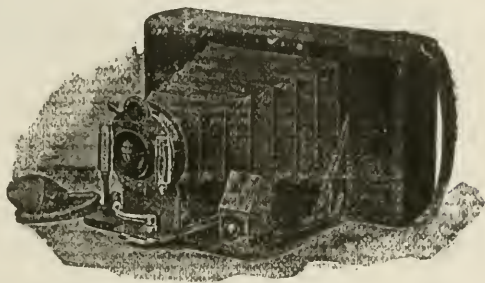

THIS is the only camera in the market having both front and rear extension of bellows—made in the Cycle form, and therefore is by far the most compact and portable. An idea of the DIFFERENCE in size between the “Century” and others can be obtained when we state that the 5 x 7 Long Focus Century Grand, closed, measures only $5\frac{1}{4} \times 9\frac{3}{8} \times 10$ inches, yet has the maximum length of bellows. Fitted with Reversible Back, Double Swing, Double Sliding Front, Automatic Bed Lock, Three-focus Convertible Lens, Latest Automatic Shutter, Triple-lens Brilliant Finder—in fact all improvements that have made the “Centurys” famous. It is one of our leaders and we are proud of it. We manufacture all kinds of cameras. Ask your dealer for catalogue or write us.

CENTURY CAMERA CO., ROCHESTER, N. Y.

A full line of Century Cameras can be seen at

SOLINE

THE SUPERB SINGLE SOLUTION SENSITIZER

Is a richly silver-laden liquid, a single application of which makes all sorts of Cloth, Paper, Postal Cards, etc., very sensitive to sunlight. Prints on Cloth are indelible. They can be toned to all of the gold or platinum tones, and they can be perfectly

fixed in Hot Soapsuds—No Hypo required. Ordinary negatives are used in printing cloth sensitized by means of Soline and the printing process is the same as with printing paper. Soline is a remarkable preparation. Those who have not used can form no adequate idea of the simplicity of its manipulation, or of the magnificent prints that it yields.

PRICE, per 2-oz. bottle, - - - 40 cents.
Can be sent by mail.

And by the way, try negatives of yours. **Intensine** on those thin or flat negatives. The results will please and surprise you; yielding a negative full of detail, contrasty, and of a beautiful printing quality, similar to the much desired Pyro-Negative.

In tubes sufficient to intensify fifty 4x5 negatives, 20c
1-oz bottles, - - - 40c

Can be sent by mail.

MICROGEN

THE MOST FLEXIBLE OF DEVELOPING AGENTS

It will not stain or injure plates, films, paper or figures. Microgen developed negatives are superb printers. Microgen developed prints are perfect in tone and rich in detail.

PRICE, per ounce, - - - 50 cents

BURKE & JAMES,

CHICAGO.

MANUFACTURERS.

NEW YORK.

IN PLATE MAKING, we have always believed that the best interests of photographers were served in supplying them with the highest quality attainable. Our latest products—the Landscape Ortho Plate, Non-Halation Ortho Plate and Chromatic Curve Corrector—are, we believe, the most perfect goods made for outdoor work. Subjects are faithfully rendered, not only for contrast of light and shade, but for color values in clouds, foliage and flowers. For both effects, these plates and the light filter are adjusted to the most delicate variations.

Our manual describes all our plates and contains much useful information. Free on request.

THE FOLLOWING UNSOLICITED
TESTIMONIAL SPEAKS *for* ITSELF

Cramer's Isochromatic Plates

are a boon to every photographer who must photograph sitters with auburn hair. The beauty of the results is surprising. The rich detail and variety of light and shade produced with these plates contrast admirably with the results, lusterless and lacking in detail, obtained on other plates.

The Instantaneous Isochromatic are sufficiently rapid for studio work, and those who try them on different subjects will be so delighted that they will order a gross so as to be sure of having them on hand when wanted.

The Medium Brand answers the same purpose as the Instantaneous, and is often used in its place, where the greatest rapidity is not essential.

The Slow Isochromatic is the plate "par excellence" for copying paintings, photographing flowers and landscape photography where the subject to be taken is not in motion.

All the plates are manufactured by

G. CRAMER DRY PLATE CO.
